EXECUTIVE SUMMARY

This report summarizes the results of an Initial Site Assessment (ISA) prepared for the proposed improvements to the State Route 210 (SR-210) and Base Line Interchange Improvement Project (herein referred to as the Project Area) in the City of Highland, California. AECOM has prepared this ISA to document any potential Recognized Environmental Concerns (RECs) within the proposed Project Area.

The Project Area is located in the City of Highland, in the County of San Bernardino, California, approximately 12 miles northeast of the City of Riverside and approximately 10 miles southeast of the City of San Bernardino. The Project Area is surrounded by several different types of land uses: residential property, commercial property, industrial property, and undeveloped land.

Due to the age of the SR-210/Base Line interchange, the existence of asbestos-containing materials (ACM) and/or lead-based paint (LBP) is unlikely. However, a field investigation is underway to test spot locations at existing bridges, where ACM or LBP would most commonly occur. If ACM or LBP is identified, all such materials that will be removed as part of construction of the project shall be removed and disposed of by a state-licensed abatement contractor in accordance with applicable state and federal laws and pertinent Caltrans specifications.

Aerially deposited lead (ADL) contaminated soils may exist in unpaved areas adjacent to traffic lanes or shoulders. Due to the age of this segment of the SR-210 facility, ADL contaminated soils are not anticipated to exist within the Project limits; however, a field investigation is underway to test spot locations in the older portion of the freeway to confirm.

Yellow thermoplastic pavement markings, paint on bridges and other types or colors of street or municipal markings may contain LBP. Based on the age of the SR-210/Base Line interchange, the existence of LBP is not anticipated; however, a field investigation is underway to confirm. In the event LBP is discovered in pavement markings, all such materials that will be removed as part of construction of the project shall be disposed of by a state-licensed abatement contractor in accordance with applicable state and federal laws and pertinent California Department of Transportation (Caltrans) specifications.

The presence of the contaminants listed above could affect whether site soils can be re-used within the right of way, or whether they require treatment or special handling and offsite disposal provisions in the construction contract. If contamination is found along the Project Area, refer to the Health & Safety Plan for the project.

An ADL, ACM and LBP field investigation is underway and will be completed prior to Project Approval.

The following is a summary of findings in general accordance with the American Society for Testing and Materials (ASTM) International *Standard Practice for Environmental Site Assessments: Phase I Site Assessment* Process E1527-13 (ASTM Practice E1527-13).

1.0 INTRODUCTION

1.1 OVERVIEW AND PURPOSE OF STUDY

The San Bernardino Associated Governments (SANBAG) in cooperation with Caltrans, District 8 and the City of Highland proposes to improve the SR-210/Base Line interchange in the City of Highland, San Bernardino County, California, by widening Base Line from Buckeye Street to Seine Avenue and widening three of the four existing SR-210 interchange ramps to reduce traffic congestion. The proposed project would also improve operations and, in compliance with current Caltrans and local agency design standards, safety.

The Project Area is located within the City of Highland, in the County of San Bernardino, California, approximately 12 miles northeast of the City of Riverside and approximately 10 miles southeast of the City of San Bernardino. The Project Area is surrounded by several different types of land uses: residential property; retail property; commercial property; industrial property; and undeveloped land (see Figures 1 and 2).

This ISA did not include testing for radon gas, vapor intrusion, lead in drinking water, aerially deposited lead (ADL) or sampling or testing of soil or groundwater. In addition, this ISA did not include a compliance audit. Radon gas, vapor intrusion and lead in drinking water are not considered to be hazardous waste risks for the Project. The likelihood of encountered ACMs and/or LBP is considered very low, as discussed in more detail later in this report. Due to the age of this segment of SR-210, ADL contaminated soils are not anticipated within the Project limits. However, an ADL, ACM and LBP field investigation is underway and will be completed prior to Project Approval.

This Initial Site Assessment (ISA) consisted of the following tasks:

- Completion of the California Department of Transportation (Caltrans) ISA Checklist included as Appendix A;
- Field reconnaissance to document current property conditions and activities at the adjacent properties. An inventory of potential contaminant sources on or adjacent to the properties was completed based on visual observations. Photographic documentation of selected properties is included as Appendix B;
- A focused regulatory agency search that included interpreting the Environmental Data Resources Inc. (EDR) computer database of county, state, and federal release sites and hazardous materials users and waste generators, landfills, existing or abandoned oil wells, and releases from subsurface pipelines is included as Appendix C;
- A review of historical information sources to evaluate whether prior land uses may have used or stored hazardous materials. These sources included historical aerial photographs and topographic maps (Appendix D); and
- Issuance of this report documenting the findings of the investigation.

1.2 ASTM STANDARD

The format and content of this ISA Report of the Project Area are in general accordance with the ASTM International (ASTM) *Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessments* (Standard Designation E1527-13).

Project objectives include identification of recognized environmental conditions (RECs) that may exist at the Project Area. The ASTM Standard Designation E1527-13 was approved by the US EPA on December 30, 2013. The goal of the ASTM Standard is to identify RECs. ASTM E1527-13 defines a REC as:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Conditions determined to be *de minimis* are not recognized environmental conditions.

The publication of ASTM Standard E1527-13 also includes the evaluation of environmental conditions as a controlled recognized environmental condition (CREC), a historical recognized environmental condition (HREC), or as a *de minimis* condition.

A CREC is defined as:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Conditions determined to be *de minimis* are not CRECs.

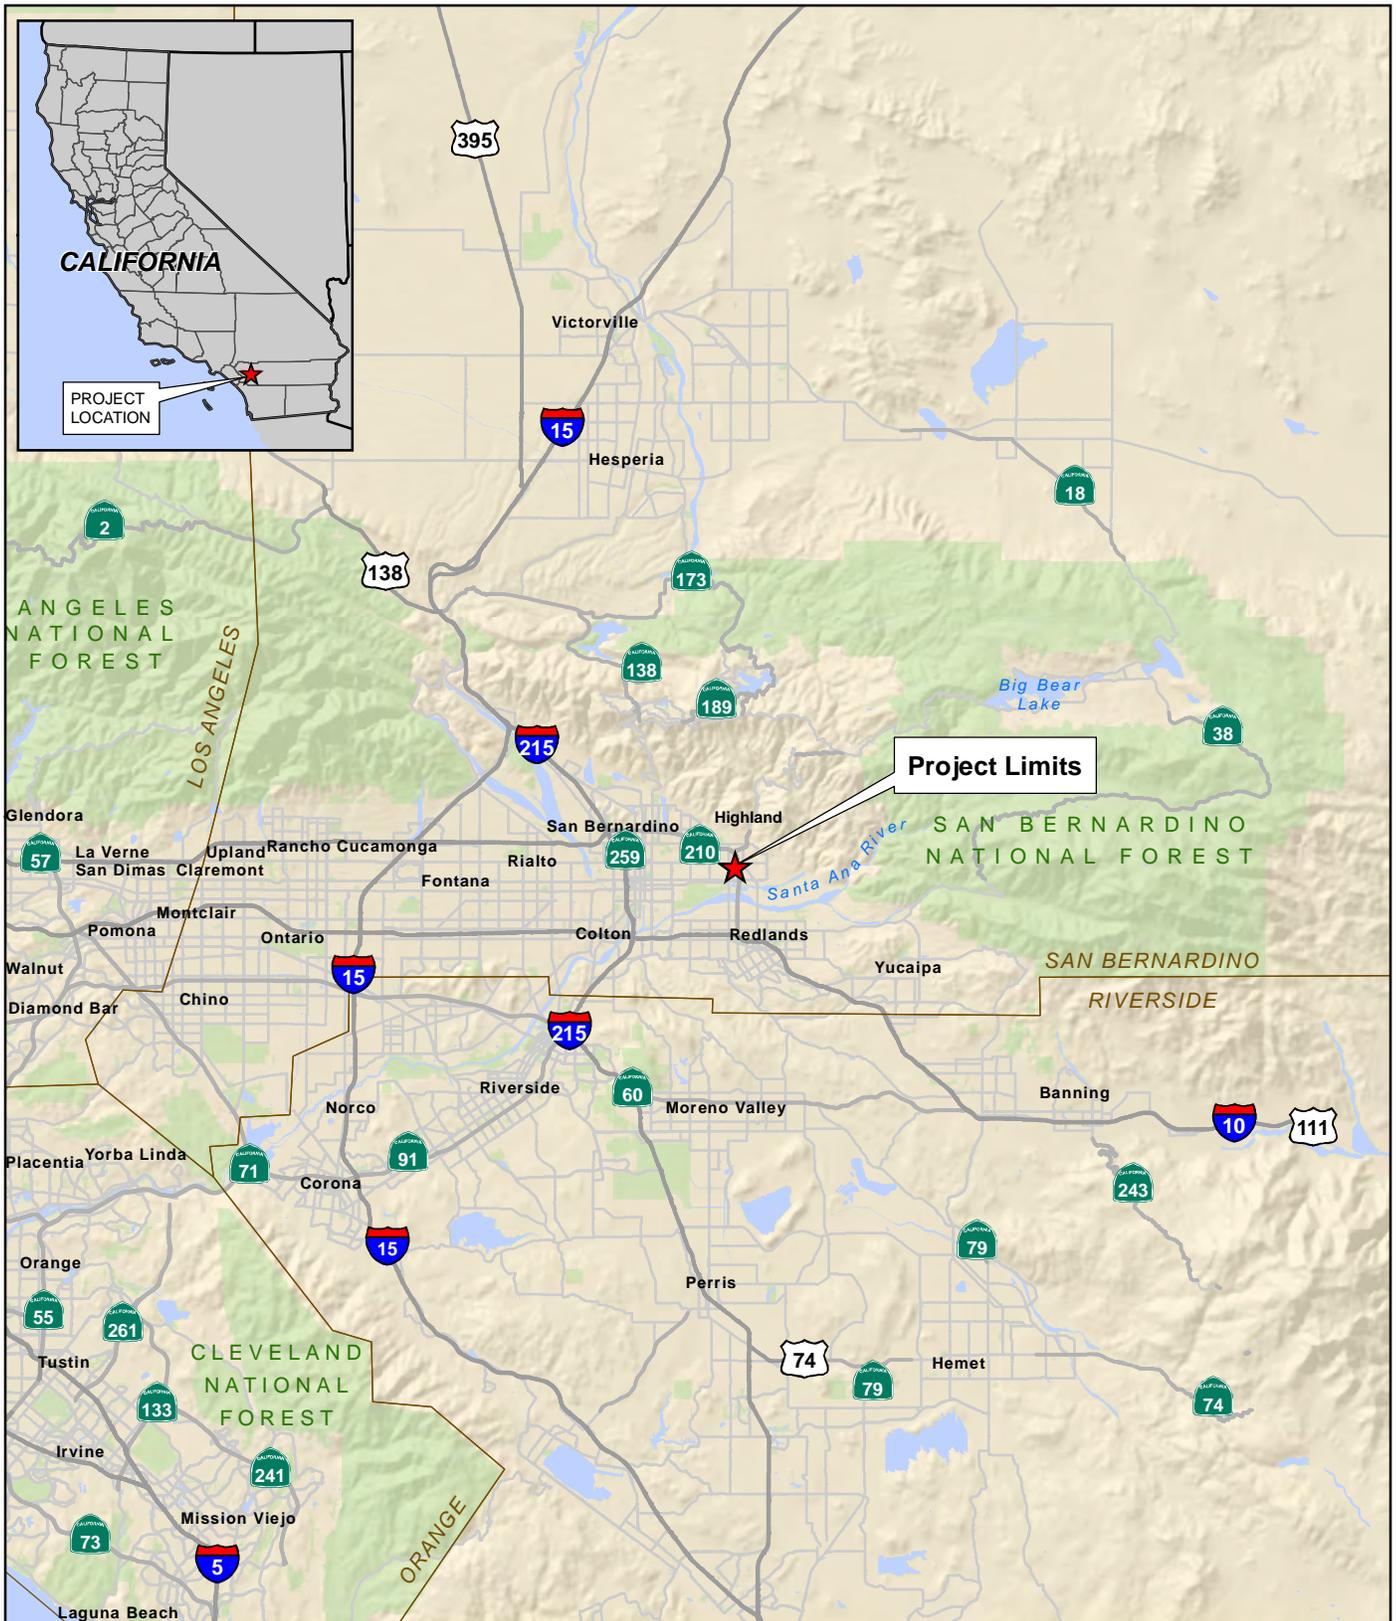

A HREC is defined as:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

A *de minimis* condition is defined as:

A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs or CRECs.

The research conducted to identify RECs focused on the historical operations of the Project Area included a review of historical aerial photographs, historical topographic maps, and other relevant materials. Our records review included selected agency files, as appropriate.

Interchange Project

2.0 SITE DESCRIPTION

2.1 LOCATION

The Project Area is located in the City of Highland, in the County of San Bernardino, California, approximately 12 miles northeast of the City of Riverside and approximately 10 miles southeast of the City of San Bernardino. The Project Area consists of the SR-210 interchange at Base Line, including the Base Line overcrossing and associated entrance and exit ramps. The Project Area is located within the United States Geological Survey (USGS) Redlands California 7.5-minute series Quadrangle (revised, 1996), Township 1 South, Range 3 West, Sections 4 and 33, San Bernardino Base & Meridian (SBBM). The Project Area is surrounded by several different types of land uses: residential property; retail property; commercial property; industrial property; and undeveloped land.

2.2 SITE VICINITY AND ADJACENT PROPERTIES

Observation and evaluation of adjoining properties were limited to features and conditions that were visible from public right of ways. The following observations were made:

North: Retail, commercial, residential, and undeveloped properties are located to the north of the interchange of SR-210 and Base Line.

South: Retail, commercial, residential, and undeveloped properties are located to the south of the interchange of SR-210 and Base Line.

East: Retail, commercial, residential, and undeveloped properties are located to the north of the interchange of SR-210 and Base Line. Commercial development southeast of the Project Area includes two service station properties, ARCO and Valero.

West: Retail, commercial, residential, and undeveloped properties are located to the north of the interchange of SR-210 and Base Line. Commercial development southwest of the Project Area includes one service station property, Unocal 76.

Properties likely to store hazardous materials were observed during the site reconnaissance in association with the three above-referenced neighboring gasoline service stations.

3.0 SITE HISTORY

Assessment of the Project Area's history is based on review of historical aerial photographs, topographic maps, and pertinent regulatory databases [e.g., Environmental Data Resources, Inc. (EDR)]. EDR provided the historical aerial photographs and the historical topographical maps for the site vicinity. Summaries of this information are provided below.

Base Line is currently a four-lane roadway that was originally constructed prior to 1930. In 1930, Base Line was a small two-lane, rural road and the first bridge over the highway was built between 1989 and 1994. The proposed improvements include widening the existing diamond interchange at SR-210 and Base Line exit and entrance ramps. Base Line would be widened through the interchange from four through lanes to six through lanes between Church Street and Boulder Avenue.

3.1 HISTORICAL AERIAL PHOTOGRAPHS

- 1930** The 1930 aerial photograph showed Base Line as a small rural two-lane road with agricultural land depicted within the vicinity of the Project Area. The Santa Ana River was depicted to the south-southeast of the Project Area.
- 1938** The 1938 aerial photograph showed Base Line as a small rural two-lane road with agricultural land depicted within the Project Area. Several farm houses were depicted in the Project Area. The Santa Ana River remained depicted south-southeast of the Project Area.
- 1953** In the 1953 aerial photograph, the Project Area appeared the same as in the previous aerial photograph. Urban development was depicted approximately 1 to 2 miles west of the Project Area.
- 1966** The 1966 aerial photograph showed an increase of development and a decrease of agricultural land within the Project Area.
- 1977** An increase of development was depicted within the Project Area. Agricultural land remained depicted to the north.
- 1989** The 1989 aerial photograph appeared the same as the 1977 aerial photograph; however, the agricultural land was no longer depicted in the vicinity of the Project Area.
- 1994** The Project Area and vicinity appeared to have an increase of development. Highway 38, predecessor to SR-210, was depicted as the diamond interchange as it appears today. The site vicinity was predominately residential, with some commercial properties. Vacant, undeveloped, land remained depicted in the site vicinity.
- 2005** The 2005 aerial photograph appeared the same as the 1994 aerial photograph.
- 2006** The 2006 aerial photograph appeared the same as the 1994 aerial photograph.
- 2009** An increase of development was depicted within the Project Area.

2010 The 2010 aerial photograph appeared the same as the 2009 aerial photograph.

2012 The 2012 aerial photograph appeared the same as the 2009 aerial photograph.

3.2 HISTORICAL TOPOGRAPHIC MAPS

1901 The 1901 Redlands, California USGS topographic map showed the Project Area approximately 1 mile south of the City of Highland. Base Line was depicted as Base Line and the Santa Ana River was depicted as City Creek located to the south-southeast.

1943 The 1943 Redlands, California USGS topographic map showed the Project Area approximately 1 mile south of the City of Highland. Base Line was depicted as Base Line Avenue and the Santa Ana River was depicted to the south-southeast.

1954 The 1954 Redlands, California USGS topographic map showed the Project Area as agricultural. Base Line was depicted as Base Line Avenue. Increased development was depicted to the west.

1967 The 1967 Redlands, California USGS topographic map showed the majority of the Project Area as developed urban land with a few areas of agricultural land.

1973 The 1973 Redlands, California USGS topographic map showed the majority of the Project Area as residential and commercial land.

1980 The 1980 Redlands, California USGS topographic map appeared unchanged from the 1973 topographic map within the Project Area. Commercial and residential growth was depicted to the north and east of the Project Area. Quarry activities appeared within the Santa Ana River bed to the south-southeast.

1988 The 1988 Redlands, California USGS topographic map appeared unchanged from the 1980 topographic map within the Project Area. Commercial and residential growth continued.

1996 The 1996 Redlands, California USGS topographic map appeared unchanged from the 1988 topographic map within the Project Area.

4.0 SITE RECONNAISSANCE

A reconnaissance of the Project Area and surrounding properties was conducted on April 26, 2015. The site reconnaissance consisted of a walking and vehicle tour of the Project Area and neighboring properties. Site photographs are provided in Appendix A. Observations recorded during the site reconnaissance are summarized below and in the following sections.

The Project Area is surrounded by several different types of land uses: residential property, commercial property, retail property, and undeveloped land. The current neighboring properties potentially generating hazardous materials and/or waste are identified below. It should be noted that all observations were made from public right of ways.

4.1 HAZARDOUS MATERIALS AND HAZARDOUS WASTES

Interiors of properties (buildings) were not evaluated for this ISA. However, hazardous materials and/or wastes expected to be present or generated at the neighboring properties are identified below.

Table 4-1. Hazardous Materials and Wastes Observed or Expected to be Present at Neighboring Properties

Occupant	Address	Substance(s)
ARCO #5913 Service Station	27727 Base Line Road Highland, CA	Diesel Fuel Premium Fuel Regular Fuel Waste Oil
East Highland Ranch Valero Service Station	27767 Base Line Road Highland, CA	Diesel Fuel Premium Fuel Regular Fuel Waste Oil
El Rancho 76 Service Station	27627 Base Line Road Highland, CA	Diesel Fuel Premium Fuel Regular Fuel Waste Oil

4.2 SOLID WASTE

Trash dumpsters were not observed within the Project Area during the site reconnaissance. Trash enclosures were observed within the neighboring retail developments.

4.3 WASTEWATER

Wastewater was not observed within the Project Area during the site reconnaissance.

4.4 ABOVEGROUND STORAGE TANKS

Aboveground storage tanks (ASTs) were not observed within the Project Area during the site reconnaissance.

4.5 UNDERGROUND STORAGE TANKS

No indication of underground storage tanks (USTs), such as vent lines or fill pipes, were observed within the Project Area during the site reconnaissance. However, three neighboring gasoline service stations were observed, an ARCO station and a Valero station to the east and a Unocal 76 service station to the west.

4.6 DRUMS AND CONTAINERS

Drums and containers were not visible within the Project Area during the site reconnaissance.

4.7 DRAINS, SUMPS OR CLARIFIERS

Drains, sumps, or clarifiers associated with waste were not observed within the Project Area during the site reconnaissance.

4.8 ONSITE WELL

No monitoring, water supply, dry, irrigation, or oil and gas production wells were observed or reported onsite during the site reconnaissance. AECOM reviewed maps available on the State of California, Department of Conservation, Division of Oil, Gas, & Geothermal Resources website for information regarding oil wells located at the subject property. No oil wells were identified on or adjacent to the subject property. The subject property is not located within an oil field.

4.9 DISCOLORED/STAINED PAVEMENT OR SOIL/STRESSED VEGETATION

Discolored soil or pavement and stressed vegetation were not observed within the Project Area during the site reconnaissance.

4.10 PITS, PONDS, OR LAGOONS

Pits, ponds, or lagoons were not observed within the Project Area during the site reconnaissance.

4.11 POLYCHLORINATED BIPHENYLS

One pad-mounted transformer was observed at the ARCO Service Station, south of the proposed Project Area. One pad-mounted transformer was observed at the 76 Service Station, south of the proposed Project Area. One pad-mounted transformer was observed at the northeast corner of SR-210 Northbound ramp and Base Line, within the proposed Project Area. Electrical service is provided to the area by Southern California Edison (SCE), which retains responsibility for maintenance and clean-up of leaks or spills associated with the transformers. The transformers observed appeared to be in good condition, with no evidence of releases or spills from the units.

4.12 ASBESTOS

Suspected Asbestos Containing Materials (ACMs) were not observed during the site reconnaissance. ACM is typically found in utility facilities, bridge shims, joints and other appurtenances. In the event that ACM is discovered during construction, work shall cease at that location and all such materials shall be removed and disposed of by a state-licensed abatement contractor in accordance with applicable state and federal regulations and pertinent Caltrans

specifications, as applicable. An ACM field investigation is underway and will be completed prior to Project Approval.

4.13 RADON

Radon is emitted by the natural breakdown and radioactive decay of uranium in rocks and soils. It may enter a structure as an off-gas by-product of building materials, natural-gas contaminant, or a water contaminant. Potential entry into buildings may occur through cracks in the foundation, sump pumps, areas around drainage pipes, and other openings. Once inside an enclosed space, radon can accumulate if the structure is not ventilated.

The Project Area is located within EPA-designated radon Zone 2. Zone 2 is defined as having an average indoor radon level of equal or greater than 2.0 and less than 4.0 pico Curies per Liter (pCi/L). The EPA action level for radon is 4.0 pCi/L. Therefore, further assessment for radon does not appear warranted.

4.14 LEAD-BASED PAINT (LBP)

Effective June 3, 1993, the Lead in Construction Standard codified in 29 CFR 1926.62 applied to sources or potential sources of lead exposure present in an "employment-related" context. The trigger mechanism for application of the standard is an activity that, by its inherent nature, may cause exposure to lead. Therefore, prior to renovation, demolition, or any activity that will cause a disturbance of any suspect lead-containing materials, sampling to determine lead content is recommended.

Yellow thermoplastic pavement markings, paint on bridges and other types or colors of street or municipal markings may contain LBP. As such, Caltrans construction specifications require the sampling and laboratory testing of existing roadway pavement markings suspected of containing lead, prior to removal methods that can result in lead concentrations at or above hazardous levels. In the event that LBP is discovered during construction, work shall cease at that location and all such materials shall be removed and disposed of by a state-licensed abatement contractor in accordance with applicable state and federal regulations and pertinent Caltrans specifications, as applicable. A LBP field investigation is underway and will be completed prior to Project Approval.

4.15 AERIALY DEPOSITED LEAD (ADL)

As is the case for any project that involves excavation, there is the potential for unknown hazardous contamination to be encountered during project construction. ADL impacted soils are typically found along older freeways with historically heavy volumes of traffic that existed during periods of leaded gasoline usage. Leaded gasoline (approximately 4.0 grams of lead per gallon) was phased out beginning in the 1970s. By 1984, average lead content in gasoline was reduced to 0.5 grams per gallon, and by 1985, it was further reduced to 0.1 grams per gallon. Highway 38, predecessor to SR-210, was constructed between 1989 and 1994; after lead in gasoline had been discontinued. As such, it is not anticipated that special handling procedures would be required for construction activities. However, an ADL field investigation is underway and will be completed prior to Project Approval.

4.16 OTHER ENVIRONMENTAL CONCERNS

Other environmental concerns were not observed or reported within the Project Area.

5.0 GOVERNMENT AGENCY INFORMATION

5.1 REGULATORY DATABASE SEARCH

The services of Environmental Data Resources, Inc. (EDR), a national environmental reporting service, were retained for the site list review. An EDR Radius Map with GeoCheck® for the project site was prepared by EDR (EDR, 2015). The EDR report presents the results of a search of federal, state and/or local databases, and three EDR proprietary databases, along with a description of each database that includes the following:

- Addresses of known underground storage tank (UST) sites;
- Landfills;
- Hazardous waste generation or treatment, storage and disposal facilities; and
- Subsurface contamination in the surrounding area.

A copy of the EDR database search report is included in Appendix C.

References to groundwater flow direction are based upon information obtained from USGS topographic maps. Shallow groundwater is inferred to flow to the west.

Sites along the Project Area and facilities identified in close proximity to, or within 0.25 mile of, the Project Area listed within the database search radii are described in Table 5-1. The EDR facility identification numbers as included in the EDR database (Appendix C) are shown in parentheses below.

Table 5-1. Database Listed Sites

Site	List	Detail
Properties Listed Near the Project Area		
ARCO #5913 Service Station (A1, A2, A3, & A4)	27727 Base Line Road Highland, CA	A database of active UST facilities. No violations reported.
East Highland Ranch Valero Service Station (C9 & C10)	27767 Base Line Road Highland, CA	A database of active UST facilities. No violations reported.
El Rancho 76 Service Station (B5, B6, & B7)	27627 Base Line Road Highland, CA	A database of active UST facilities. No violations reported.

Based on the distance from the Project Area, the regulatory status, and relative location with respect to groundwater flow in the area, the potential for the above facilities to have created a REC at the Project Area is low.

The Orphan facilities were reviewed for potential impacts to the Project Area. Orphan sites are sites that cannot be mapped due to poor or inadequate information provided by the agencies. Based on the limited information provided, it appears that there are no Orphan sites located in the vicinity of the Project Area.

5.2 REGULATORY CONTACTS

Agency representatives were not contacted to discuss or obtain information regarding the project area. The information regarding sites (e.g., database listed sites) was obtained from a review of available sources.

California Environmental Protection Agency (Cal/EPA), Department of Toxic Substances Control (DTSC) – The Project Area was not identified in the online Envirostor database maintained by the DTSC, reviewed by AECOM on April 26, 2015 (<http://www.envirostor.dtsc.ca.gov/public/>).

Regional Water Quality Control Board (RWQCB) – The Project Area was not identified in the online GeoTracker database maintained by the State Regional Water Resources Control Board, reviewed by AECOM on April 26, 2015 (<http://geotracker.waterboards.ca.gov/>).

California Department of Conservation, Division of Oil, Gas, and Geothermal (DOGGR) Online Mapping System (DOMS) – No oil or gas wells were identified in the online DOMS database maintained by DOGGR, reviewed by AECOM on April 26, 2015 (<http://maps.conservation.ca.gov/doms/index.html>).

6.0 CONCLUSIONS AND RECOMMENDATIONS

The purpose of the project is to improve traffic operations in the interchange area. The improvements include widening of the SR-210 interchange at Base Line and widening of the existing Base Line overcrossing. This ISA was conducted in general accordance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Site Assessment Process* E1527-13 (ASTM Practice E1527-13).

6.1 GENERAL RECOMMENDATIONS

This ISA is based on known sites listed in database records and a field reconnaissance performed from readily accessible public roads or other vantage points. No survey of private properties or testing of soils or groundwater was performed. The project will involve excavation and grading activities, and there is the potential that areas within the proposed right of way may contain soils or groundwater that is contaminated. Potential contaminants include the following:

Due to the age of SR-210, the existence of asbestos-containing materials (ACM) and/or lead-based paint (LBP) is unlikely. However, a field investigation is underway to test spot locations at existing bridges, where ACM or LBP would most commonly occur. If ACM or LBP is identified, all such materials that will be removed as part of construction of the project shall be removed and disposed of by a state-licensed abatement contractor in accordance with applicable state and federal laws and pertinent Caltrans specifications.

Aerially deposited lead (ADL) contaminated soils may exist in unpaved areas adjacent to traffic lanes or shoulders. Due to the age of this segment of the SR-210 facility, ADL contaminated soils are not anticipated to exist within the Project limits; however, a field investigation is underway to test spot locations in the older portion of the freeway to confirm.

Yellow thermoplastic pavement markings, paint on bridges and other types or colors of street or municipal markings may contain LBP. Based on the age of the SR-210/Base Line interchange, the existence of LBP is not anticipated; however, a field investigation is underway to confirm. In the event LBP is discovered in pavement markings, all such materials that will be removed as part of construction of the project shall be removed and disposed of by a state-licensed abatement contractor in accordance with applicable state and federal laws and pertinent Caltrans specifications.

The presence of the contaminants listed above could affect whether site soils can be re-used within the right of way, or whether they require treatment or special handling and offsite disposal provisions in the construction contract. If contamination is found along the Project Area, refer to the Health & Safety Plan for the project. An ADL, ACM and LBP field investigation is underway and will be completed prior to Project Approval.

6.2 SITES WITH POSITIVE FINDINGS

This ISA is not considered a “Positive” ISA. That is, there are no positive findings of sites where further investigation for environmental hazards is recommended. However, there are sites identified on neighboring properties that may have hazardous materials or wastes onsite.

6.3 SITES REQUIRING VERIFICATION

Sites listed as “Requiring Verification” in Table 4-1 are not listed as active hazardous waste sites, but are known to contain potential sources of contamination (e.g., USTs). However, none of the properties included in Table 4-1 are currently identified as parcels from which additional right of way acquisition is proposed.

Based on observations made during the site reconnaissance, review of the environmental regulatory database, and review of aerial photographs, the potential for RECs within the Project Area is deemed to be low and; therefore, further assessment does not appear warranted.

7.0 LIMITATIONS

The conclusions presented in this report are professional opinions based solely upon indicated data described in this report, visual observations of the Project Area and site vicinity, and our interpretation of the available historical information and documents reviewed, as described in this report. They are intended exclusively for the purpose outlined herein and the site locations and project indicated.

It should be recognized that this ISA was not intended to be a definitive investigation of contamination at the Project Area, and the conclusions provided herein are not necessarily inclusive of all the possible conditions. Given that the scope of services for this investigation was limited, and because exploratory borings, soil and/or groundwater sampling, and analytical testing was not undertaken, it is possible that currently unrecognized subsurface contamination may exist at the Project Area. AECOM makes no representations regarding the value or marketability of the Project Area or the suitability for any particular use, and none should be inferred based on this report.

Discussion presented herein apply to the site conditions existing at the time of our investigations and cannot necessarily apply to site changes of which AECOM is not aware and has not had the opportunity to evaluate. Changes in the conditions of the Project Area may occur with time due to natural or human-related processes on the Project Area or adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond our control.

8.0 PREPARER SIGNATURES AND QUALIFICATIONS

This section includes qualification statements of the environmental professionals responsible for conducting the Initial Site Assessment (ISA) and preparing this report.

The site visit was conducted by Ms. Janet Tentler of the AECOM office in Ontario, California. Ms. Tentler holds a Bachelor of Arts degree in Environmental Studies from an accredited university and has over 15 years of experience in environmental site investigations, characterizations, and assessments, including Phase I Environmental Site Assessments (ESAs).

The work conducted by Ms. Tentler was supervised, and the report was reviewed by Ms. Katherine Brady, Registered Environmental Assessor (REA). Ms. Brady holds a Bachelor of Arts degree in Biology and a Master of Science degree in Environmental Studies from accredited universities and has over 15 years of experience with Phase I Environmental Site Assessments.

Ms. Brady declares that, to the best of her professional knowledge and belief, she meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

Ms. Brady has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. With the assistance of Ms. Tentler, she has developed and performed this ISA with the standards and practices set forth in 40 CFR Part 312.

APPENDIX A
INITIAL SITE ASSESSMENT CHECKLIST

Initial Site Assessment (ISA) Checklist

Project Information

District: 08 County: San Bern Route SR-210 / Base Line

Post Mile: R28.3/R30.3 EA: 1C970

Description: The San Bernardino Associated Governments (SANBAG) in cooperation with Caltrans, District 8 and the City of Highland proposes to improve the SR-210/Base Line interchange in the City of Highland, San Bernardino County, California, by widening Base Line from Buckeye Street to Seine Avenue and widening three of the four existing SR-210 interchange ramps to reduce traffic congestion.

Is the project on the HW Study Minimal-Risk Projects List (HW1)? No

Project Manager: Awais Sheikh, CT Oversight Phone # (909) 381-1772

Project Engineer: Stephanie Hillebrand, AECOM Phone # (714) 567-2400

Environmental (Manager) Office Chief: Aaron Burton, CT Oversight Phone # (909) 383-2841

Environmental Planner Generalist: Essra Mostafavi Phone # (909) 383-4631

Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified.

1. Project Features: New R/W? Yes Excavation? Yes Railroad Involvement? No
Structure demolition/modification? Yes (i.e., The proposed improvements would include widening of the Base Line overcrossing).

Subsurface utility relocation? Yes

2. Project Setting: SR-210 and Base Line Interchange.

3. Rural or Urban: Urban

Current land uses: SR-210

Adjacent land uses: Commercial/Retail, Residential, and Undeveloped

4. Check federal, state, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project.

See Appendix C of the ISA Report

5. Conduct Field Inspection. Date: 04/26/15

STORAGE STRUCTURE / PIPELINES:

Underground tanks: None Observed Surface tanks: None Observed

Sumps: None Observed Ponds: None Observed

Drums: None Observed Basins: None Observed

Initial Site Assessment (ISA) Checklist (continued)

Transformers: One transformer was observed near the SR-210 northbound ramp.

Landfill: None Observed

Other: None Observed

CONTAMINATION: (spills, leaks, illegal dumping, etc.)

Surface staining: No Oil sheen: No

Odors: No Vegetation damage: No

Other: N/A

HAZARDOUS MATERIALS: (asbestos, lead, etc.)

Buildings: No Spray-on fireproofing: No

Pipe wrap: No Friable tile: No

Acoustical plaster: No Serpentine: No

Paint: No Other: No

Use the attached map to show the location of potential hazardous waste sites.

6. Other comments and/or observations: As is the case for any project that involves excavation, there is the potential for unknown hazardous contamination to be encountered during project construction. For unknown hazardous waste/material encountered during proposed project construction, the procedures outlined in the "Caltrans Construction Hazardous Waste Contingency Plan" shall be adhered to.

There is a potential that the proposed project could affect yellow thermoplastic pavement markings and other types or colors of street or municipal markings containing lead-based paint. If such markings are affected as a result of the project, such markings will be collected, tested, and/or disposed of in accordance with applicable regulations.

There is a potential that the proposed project could affect asbestos containing materials (ACM) within the existing bridges. If detected, ACM removal and disposal would be addressed through specifications in the project's PS&E package.

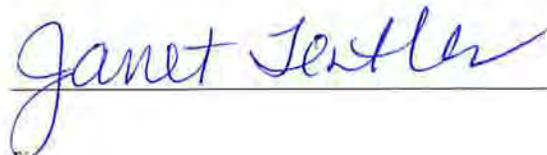

Aerially deposited lead (ADL) contaminated soils are not anticipated with this Project. SR-210 was constructed between 1989 and 1994; after lead in gasoline had been discontinued. Leaded fuel was phased out of use beginning in the 1970s. As such, it is not anticipated that special handling procedures would be required for construction activities.

ISA Determination

Does the project have potential hazardous waste involvement? No (i.e., low risk). If there is known or potential hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the Investigation? No. If "Yes", explain; then give an estimate of additional time required: _____

A brief memo should be prepared to transmit the ISA conclusions to the Project Manager and Project Engineer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 03/11/2015 has revealed that there are 3 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 3 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Not reported	27627 BASELINE ST	W 0 - 1/8 (0.107 mi.)	B7	14

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: Yes
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: Yes
Used oil transporter: Yes

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Event date: 06/09/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 06/09/2010
Event: CA550RC

Event date: 06/09/2010
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 04/02/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/08/2015
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/21/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/07/2014	Telephone: 703-603-8704

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 02/26/2015
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/15/2015
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency

	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 03/11/2015	Source: Department of Toxic Substances Control

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/25/2015	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/10/2015	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

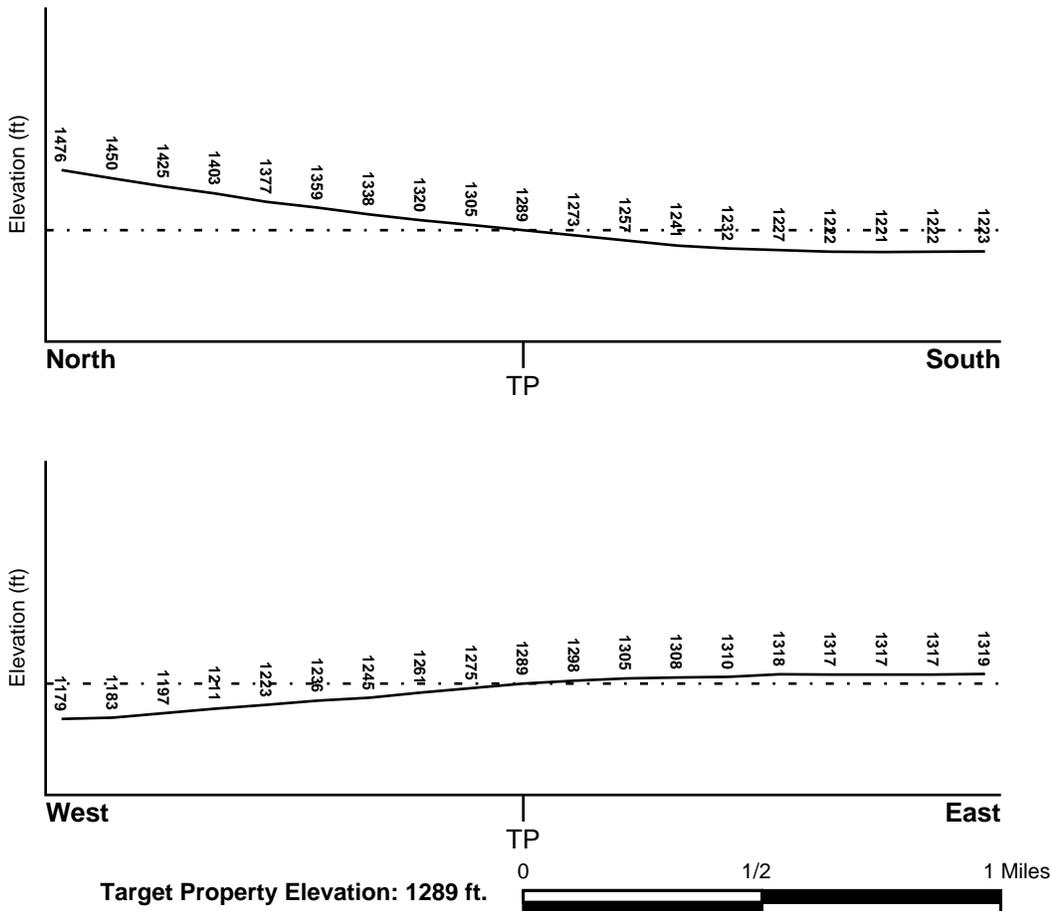

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SAN BERNARDINO, CA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
---	---

Flood Plain Panel at Target Property: 06071C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> NOT AVAILABLE	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	35 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	35 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Soboba

Soil Surface Texture: very stony loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	very stony loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 6.1 Min: 5.6
2	9 inches	59 inches	very stony sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 141	Max: 7.8 Min: 6.6

Soil Map ID: 3

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
